Summary

Senior Backend Software Engineer with 6+ years of experience building fintech platforms, payment integrations, and API-driven systems using Ruby on Rails. Experienced in designing integration services, working with external payment providers, and collaborating with customers and technical partners to deliver reliable solutions.

Strong background in third-party integrations, micro-service architectures, API development, automated testing, and continuous delivery practices. Comfortable working across engineering and business boundaries, from investigating complex external systems to supporting technical onboarding and integration challenges.

Technical Skills

Backend: Ruby, Ruby on Rails, PostgreSQL, SQL, REST APIs, Microservices, Third-party integrations

Architecture: OpenAPI / Swagger, Service-oriented architectures, SDK development, Database design

Practices & Tools: RSpec, TDD, Automated testing, CI/CD, Docker, AWS, Git, Agile/Scrum, AI-assisted development workflows

Additional: JavaScript, React/TypeScript (personal project), Go (personal projects)

Professional Experience

AZA Finance

Software Engineer → Senior Software Engineer

April 2019 – August 2025 Promoted to Senior Software Engineer in January 2023

Progressed from Junior Software Engineer to Senior Software Engineer, contributing to fintech platforms and payment infrastructure. Worked across backend services, third-party integrations, SDKs, customer onboarding, and technical collaboration with external partners.

- Took ownership of end-to-end third-party payment integrations, from technical investigation and provider API analysis through integration microservices, internal API exposure, and testing infrastructure.
- Integrated with diverse payment providers across multiple markets, handling differences in API maturity, documentation quality, and implementation behaviour.
- Contributed to standardising third-party integration development through reusable service patterns and templates, reducing simpler integration timelines from approximately three sprints to one sprint.

- Developed reusable testing harness patterns to simulate external APIs, reducing dependency on third-party systems during development and improving integration reliability.
- Supported client onboarding and API adoption through technical guidance, troubleshooting, and collaboration with customers and external providers.
- Worked on complex integration requirements for strategic customers, including API extensions and custom integration layers built on top of existing payment capabilities.
- Participated in code reviews, architecture discussions, technical decision-making sessions, developer interviews, and acted as a technical reference point for integration-related challenges.

StayAhead

Software Engineer (Personal Project)

2025 – Present

Developing a personal application focused on commitment tracking and recurring services management.

- Building a Ruby on Rails backend with PostgreSQL, with a React/TypeScript frontend currently in development.
- Designing application architecture and applying modern engineering practices including automated testing, AI-assisted development workflows, and iterative product development.

Hospitality Management & Customer Service

2005 – 2018

Built a career in high-end hospitality environments across Italy, Australia, and the United Kingdom, progressing into senior operational roles.

- Managed teams and front-of-house operations in luxury hospitality environments.
- Developed strong communication, leadership, customer relationship management, and problem-solving skills in fast-paced international settings.

Education

Makers Academy — Software Engineering Bootcamp (2018–2019)

IPS Albe Steiner — Graphic Design Diploma (1999–2004)

Languages

Italian (Native) · English (Fluent, spoken and written) · French (Basic written comprehension)

Interests

Nature, hiking and cycling · Reading and cinema · Chess
